

# MILITARY BARRACKS

**Palm Harbor Homes was Selected to Build Barracks for US Army at Fort Leonard Wood, MO**

#### **OPPORTUNITY:**

The US Corps of Engineers was tasked with providing barracks for soldiers training in specialized combat techniques at Fort Leonard Wood in Missouri. PHN Commercial Structures, a division of Palm Harbor Homes, was able to design, build and install 2-story barracks in a short time frame.

#### **PROJECT BUILDER:**

Modular units were installed on their foundation in April 2008, with beneficial occupancy in July of the same year.

#### **MODULAR CONSTRUCTION SOLUTION:**

PHN constructed 2-story Advanced Instruction Training Barracks. The project was designed using relocatable structures which decreased the time to occupy, reduced the overall cost, and allowed for relocating and re-purposing the buildings if needed in the future. PHN was able to install and complete the buildings with minimal personnel and resulting disruption to Army security. The \$5 million project was completed on time and on budget.
