

MILITARY BARRACKS

Palm Harbor Homes Selected to Build Battalion Project for US Army at Fort Polk, LA

OPPORTUNITY:

The US Corps of Engineers' objective was to provide Barracks and Company Operations Facilities as part of a significant expansion of troop support infrastructure to facilitate advanced combat training for Middle East operations. PHN Commercial Structures was able to design, build and install single story relocatable structures in a very short time frame.

PROJECT TIME FRAME:

Modular units were installed on their foundation in January 2009, with beneficial occupancy in July of the same year.

MODULAR CONSTRUCTION SOLUTION:

The project was designed using relocatable structures which decreased the time to occupy, reduced the overall cost, and allowed for relocating and re-purposing the buildings if needed in the future. PHN was able to design, manufacture, install and complete the buildings with minimal personnel and resulting disruption to Army security. The \$105 million project was completed on time and on budget.
