

MILITARY BARRACKS

**PHN Commercial Structures Chosen to Build
Comprehensive Battalion project for US Army at Fort Sill, OK**

OPPORTUNITY:

The US Corps of Engineers was tasked with providing billeting and operational buildings at the US Army base at Fort Sill, OK. The project was urgent and extensive. The Corps turned to PHN Commercial Structures, a division of Palm Harbor Homes, to make it happen.

PROJECT TIME FRAME:

Modular units were installed on their foundation in March 2008, with beneficial occupancy in July of the same year.

MODULAR CONSTRUCTION SOLUTION:

PHN Commercial constructed 2-story Basic Training Barracks, Advanced Instructional Training Barracks, Company Operations Facilities and a Battalion Headquarters. The project was designed using relocatable structures which decreased the time to occupy, reduced the overall cost and allowed for relocating and re-purposing the buildings if needed in the future. The \$25 million project was completed on time and on budget.
