

# Corporate Capabilities

## Company Summary

PHN Commercial Structures is a modular construction specialist. The company's commercial modular experience covers 5 decades. We are a leading provider of engineered modular solutions for temporary and permanent applications serving commercial, education, construction, government and multi-family projects across the United States. Our design/build services provide our clients unmatched depth and breadth of products, full service capabilities and support, nationwide reach, optimal geographic distribution and highly efficient sourcing. This combination brings together people, capabilities and capital to provide leading products and services to our customers.
